

NOTES FOR EXERCISES IN SESSION 11
-----------------------------------

\* VER:22; exam2013:2; exam2014:2; add10:7 (VER:20)

Schedule today:

- \* review exercise (Suppada): add10:6,
- review or individual discussions of VER:20 ?,
- you work on the exercises on your own;  
note: add10:7 is a repeated measures problem.

Other news:

- 3rd/5th home assignment due Thursday (March 24),
- a good time for you to get started on project work.

What you should be able to do after today's session...

- recognise hierarchical and/or split-plot data structures in experimental designs,
- analyse simple random effects models, for continuous and binary outcomes.
