

REVIEW/DISCUSSION SESSION 4

Same setup as last time:

- feel free to leave your camera off,
- discussion can occur through the chat or verbally (unmute yourself and speak up),
- session will be recorded, but only posted on Moodle.

Logistic regression lab on Monday (Feb 7)?

- optional and in-person (possibly also a stream) to work on logistic regression problems (as well as older stuff),
- do we want to go ahead with it? for 13-16 or 9-12?

Tentative outline of today's session:

- for each of lectures 4a and 4b:
 - * discussion/questions about topics?
 - * questions/review of do-files?
- discussion of Logistic Regression Exercises (VER 16) # 1 & 2, with Stata demonstrations, as needed
 - * all program and solution files posted at VHM 802 site,
- (maybe) further discussion of extra exercises from “Additional Exercises for Session 4: Logistic regression”.
